# radio.net

Embedded Player

Embedded Player

Advantages for Stations

Free
Enhance your website with the free plugin.

More Reach
The radio.net Embedded Player is the quickest way to your programme.

Better Ranking on radio.net
Each listener impoves your ranking on our platform.

Advantages for Site Admins

Free
A new function for your site with no additional costs.

Increase Duration
With the right radio programme, keep visitors on your website longer.

Choose From Over 40,000 Stations
From music to news to sports, radio.net offers the perfect package.

This Is How It Works

You can find the code for embedding the Standard Player on each station page on radio.net behind the button ´Embed´ (just below the name of the station). You can adjust the player width and choose whether playback starts automatically upon loading of the page (autoplay). Afterwards, you can copy the code and integrate it into your website or blog.
